JavaScript | ReactJS | HTML | CSS | SASS | Redux | Splunk | JIRA | SignalFx | Linux | Bash | MongoDB | Postgres | ElasticSearch | Docker | AWS | Terraform | Python | MaterialUI | Agile

PROJECTS

Unifind.ca landing page

- UniFind aims to create an innovative platform that will help high school students make the right choice of university and program through current students' real-life experience.
- Tech Stack: HTML, CSS, JavaScript, GSAP, Node.JS, Express

Entrylevel.io,

- Entrylevel is a job aggregator targeting students, recent grads, career changers, and individuals with less than 3 years of experience.
- This product was featured on HackerNews and reached over 60,000 users.
- Tech Stack: HTML, CSS, JavaScript, ReactJS, NodeJS, PostgreSQL, Nginx, Elasticsearch, MaterialUI, Python3

WORK HISTORY

Part-time Operations Engineer – Menlo Security, Mountain View, CA, 2017 – present

- Increased visibility of the product for the engineering teams by creating/updating alerts, reports, and Dashboards using Splunk
- Implemented different monitoring solutions using Splunk, SignalFx, and AWS
- Formalized documentation standards on frequent processes and monitoring runbooks to ease the information transfer process
- Increased operations efficiency by writing Python and Bash script for manual tasks

Contract Software Engineer – UmiDesk, Remote, 09/2019 – 01/2020

- Developed product MVP using JavaScript, PostgreSQL, Node.js, React.js and more
- Reduced the number of bugs for UmiDesk's Web application
- Increased search capabilities of UmiDesk application by implementing an Elastic search cluster to replace the current search methods

EDUCATION

Lambda School – Full Stack Web Development Program 05/2019 – 08/2020

Foothill College – Computer Science 05/2018 – 05/2020
