PERSONAL PROJECTS

Qestr (11/2019 – Present)

- Qestr is an online platform giving students a place to ask questions related to their classes and professors. This will allow them to build a community that's good enough to support themselves studying and other individuals who don't have tutors or friends to study with.
- Development link: <https://qestr-front-end.now.sh/dashboard>
- Front-end Github Link: <https://github.com/college-qestr/qestr-front-end>
- Back-end Github Link: <https://github.com/college-qestr/qestr-backend>

Domestic Violence Empathy Builder (08/2019 – Present)

- The goal is to develop a tool that can give people who experience domestic violence an estimate of how much money they would need to have in order to relocate.
