## Products

[entrylevel.io](http://entrylevel.io) – an entry level job aggregator.

## Work History

### **Operations Intern, Menlo Security (2017 - Present)**

- Create/Update Alerts, reports, and Dashboards using Splunk
- Integrate external/internal Monitoring tools
- Create Anomaly Detectors for the DevOps team
- Provide data to other team so they can make data driven decisions

### **Co-founder, entrylevel.io (2020 – Present)**

- Created entrylevel.io, a job aggregator targeting students, recent grads, career changers, and individuals with less than 3 years of experience.
- Apply for partnership/affiliate programs to generate revenue.
- Establish an online presence and navigated more than 3000 users to the website.
- Generated an average of \$200/month from partnership programs.

### **Contract Software Engineer, Umi Desk (Sept 2019 – Jan 2020)**

- Help develop product MVP before launch
- Fix existing bugs in the product
- Implement a standalone Elastic search cluster

## Education

### **Lambda School (May 2019 – Now)**

- Full-Stack Web Development

### **Foothill Community College (2017 – now)**

- Computer Science
- GPA: 3.4

#### *Relevant course work*

- Calculus Series
- Data Structures and Algorithms
- Intro to Linux
- Python for Web Development
- Database Management Systems
